By Motion Type — Kinematic Object Motions (Horizontal, Vertical, Circle, Hold) | Dynamic Object Motions (Obj Drop, Slide, Throw, Tumble) | Sand Free-Fall (Flat Ground)

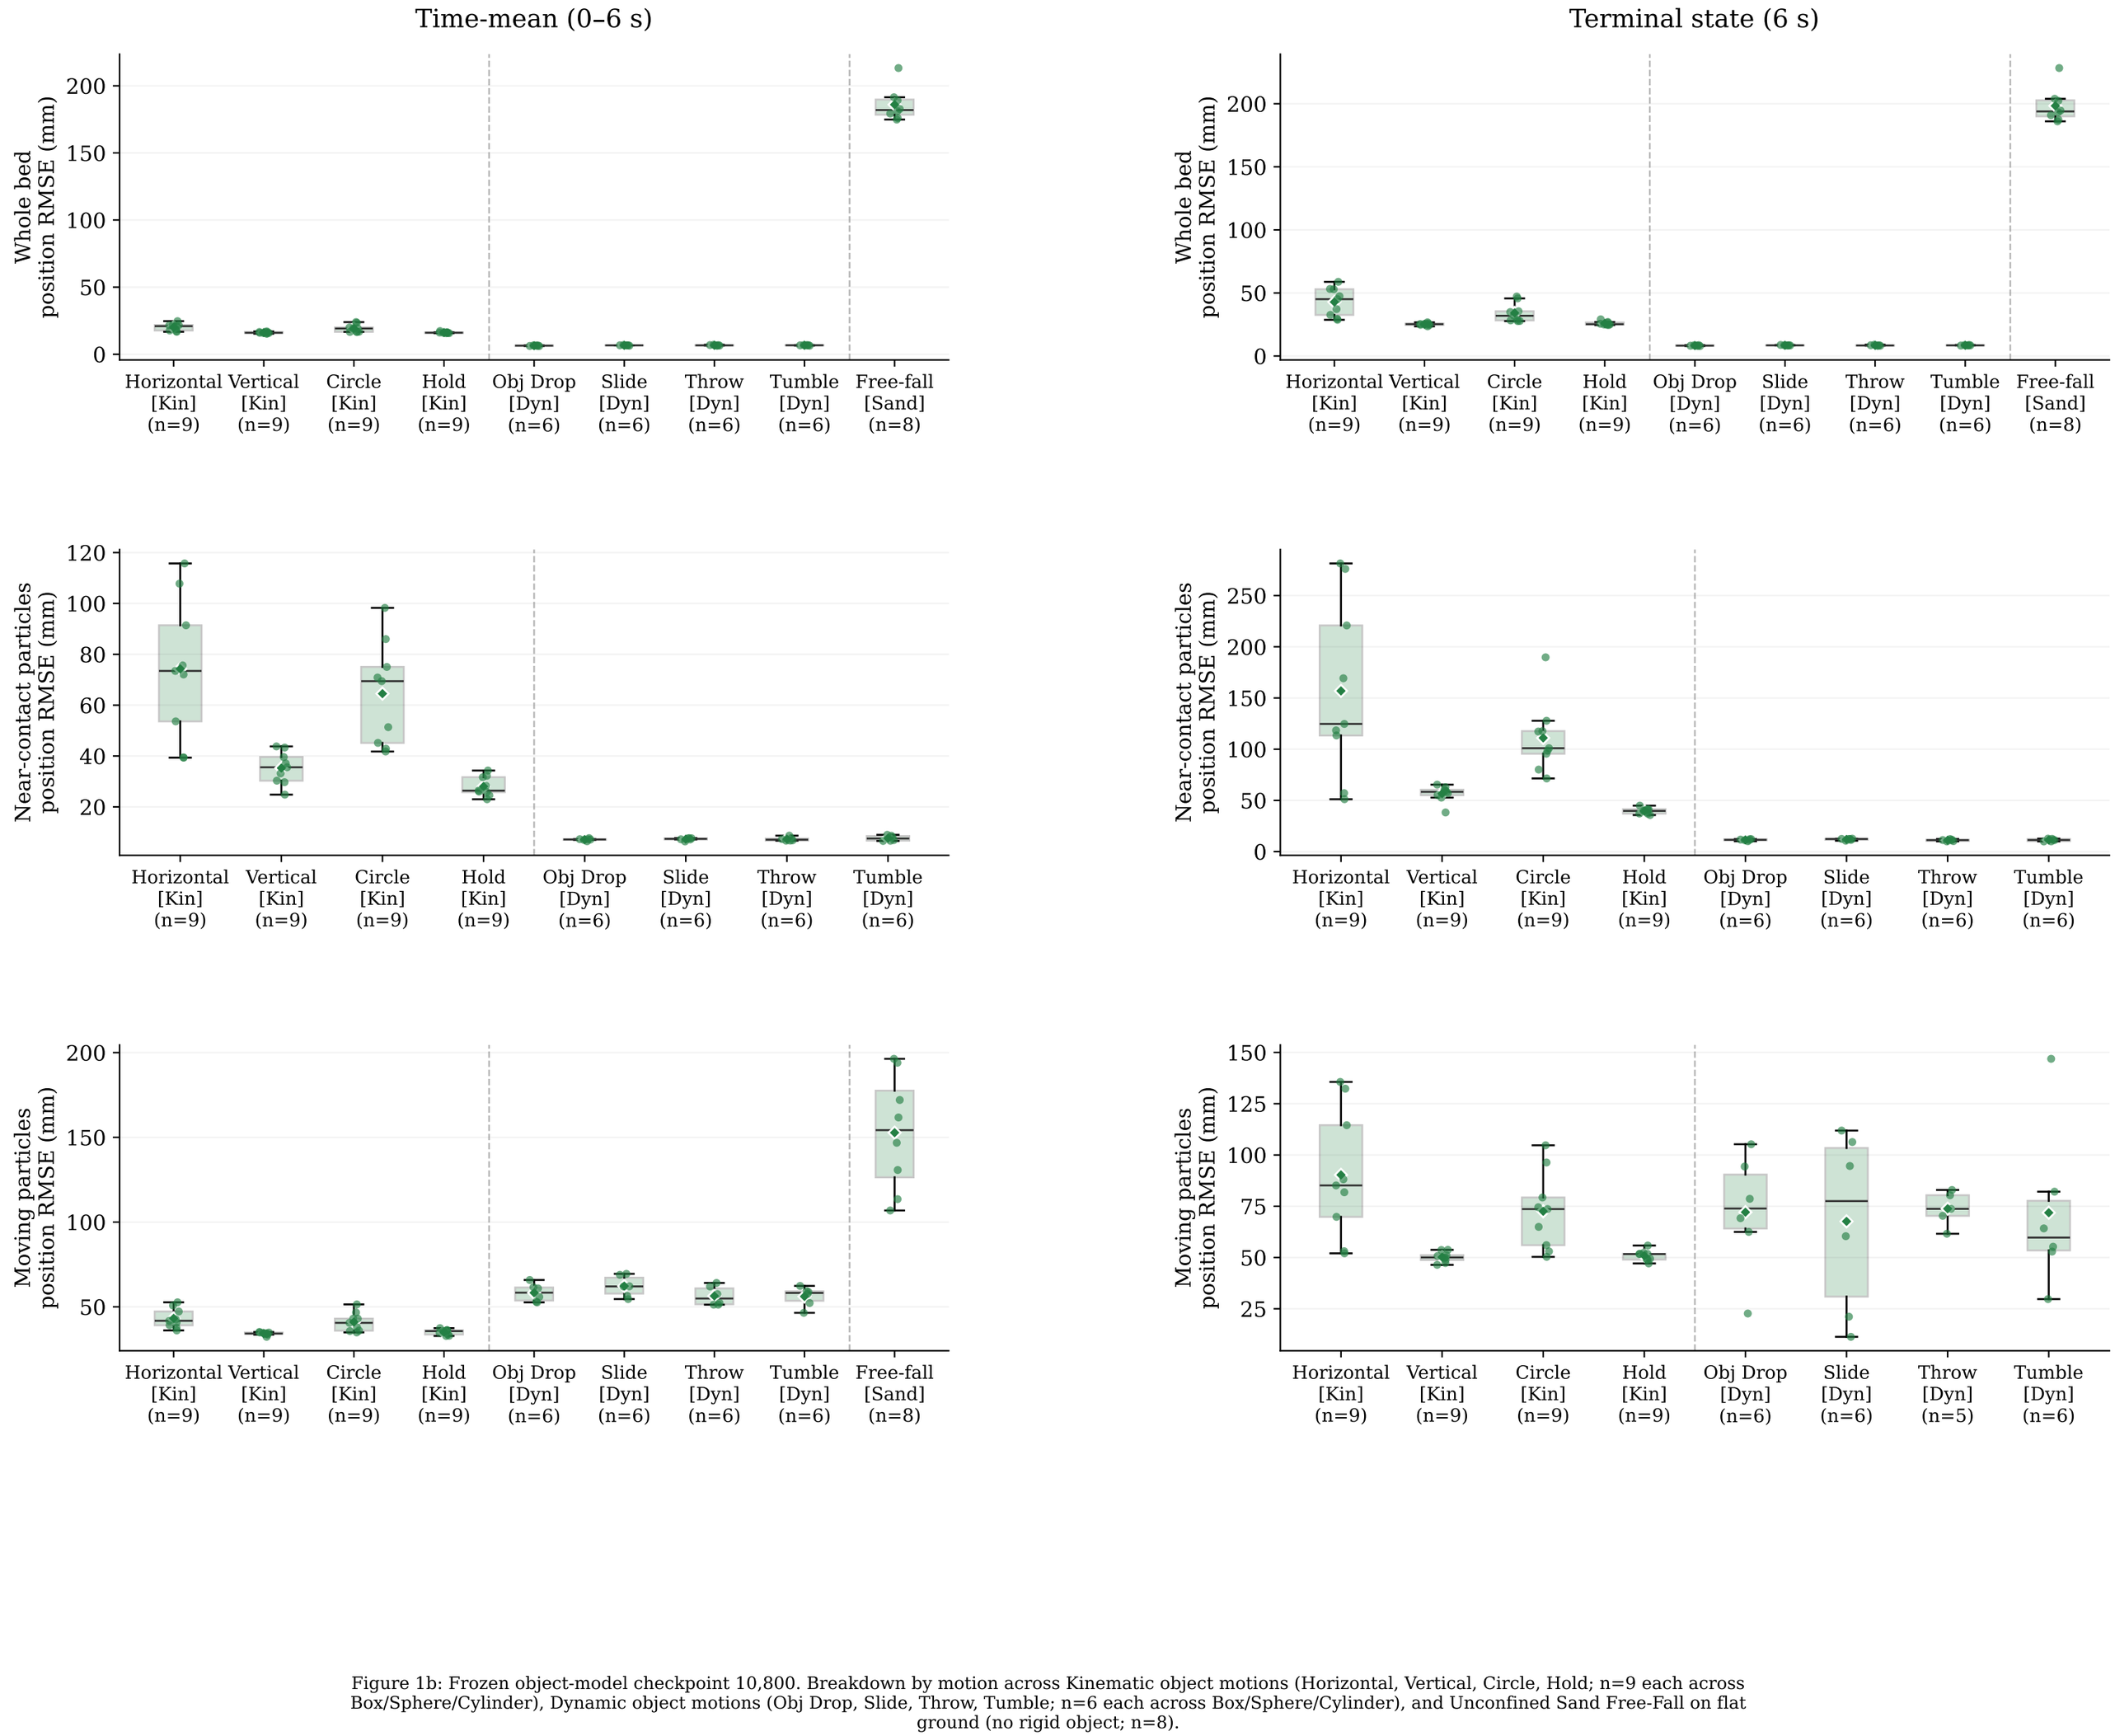

Figure 1b: Frozen object-model checkpoint 10,800. Breakdown by motion across Kinematic object motions (Horizontal, Vertical, Circle, Hold; n=9 each across Box/Sphere/Cylinder), Dynamic object motions (Obj Drop, Slide, Throw, Tumble; n=6 each across Box/Sphere/Cylinder), and Unconfined Sand Free-Fall on flat ground (no rigid object; n=8).
