

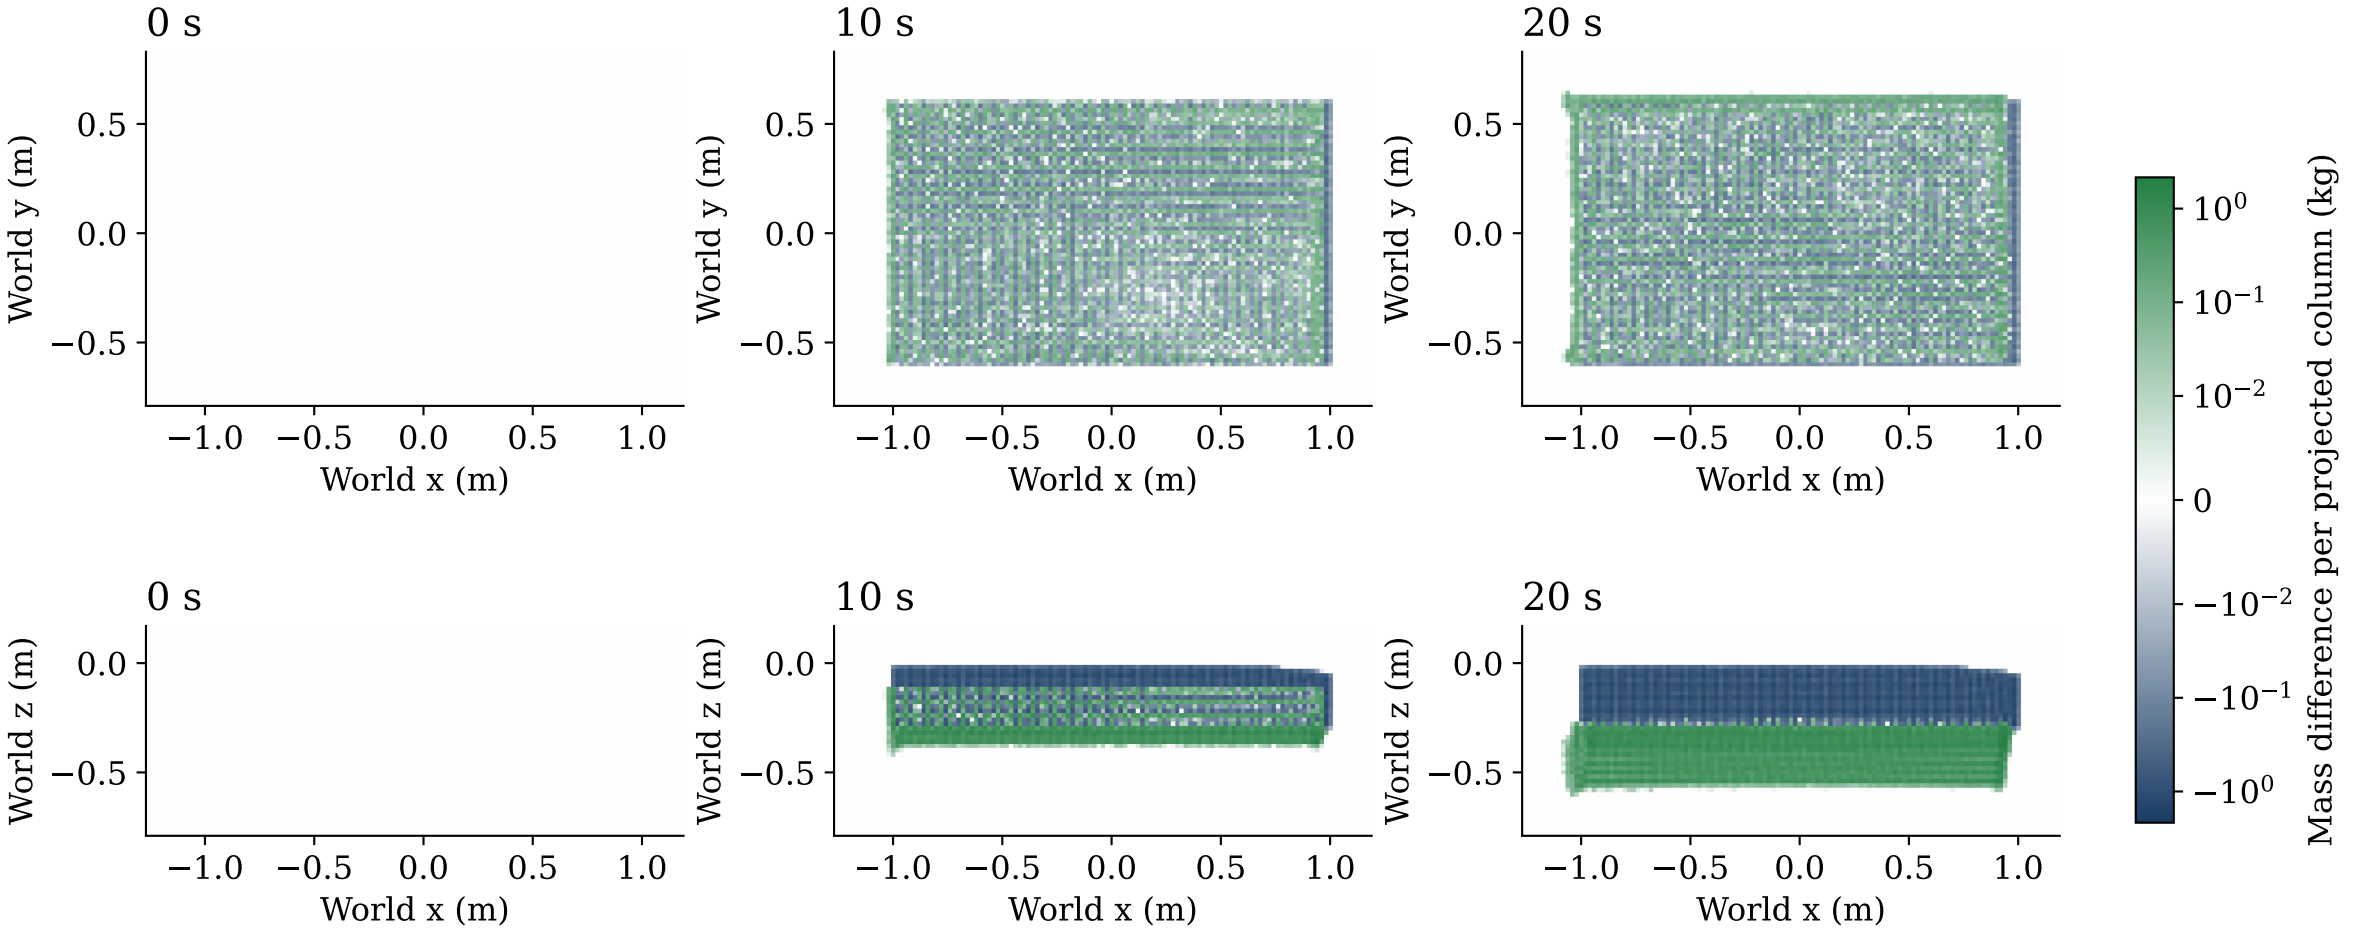

Figure 4: Local material redistribution error in one paired rollout at the labeled times.
Top row 0 s, 10 s, 20 s: xy maps summed along z.
Bottom row 0 s, 10 s, 20 s: xz maps summed along y.
Green indicates excess predicted mass; navy indicates missing predicted mass. Both use the same 0.02 m grid.
The shared color scale is symmetric logarithmic, linear within ±0.01 kg; no values are clipped.
