Group B: By Object Motion (Per-Shape Breakdown: Box, Sphere, Cylinder) — Kinematic (n=3/obj) | Dynamic (n=2/obj)

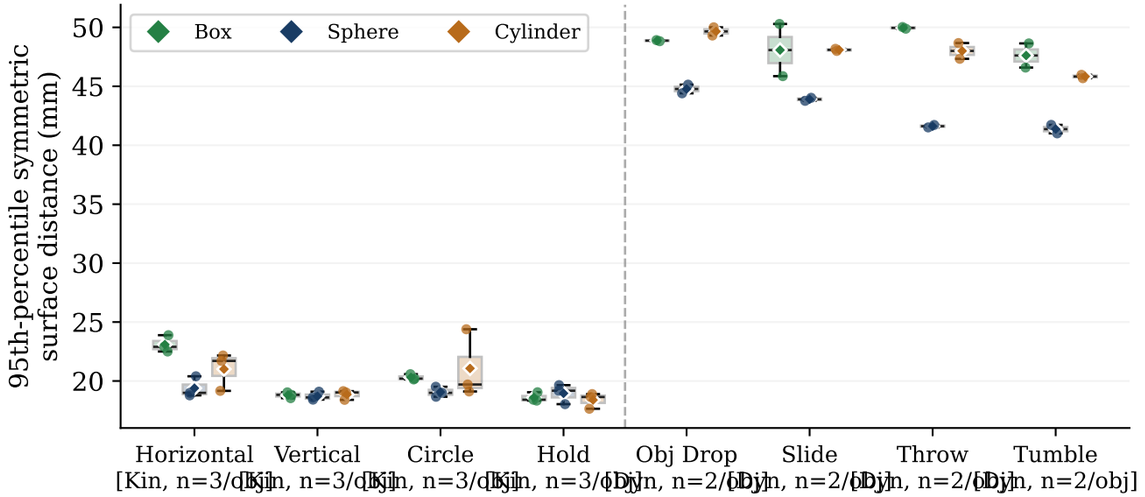

Figure 2b: Frozen object-model checkpoint 6,000. Symmetric sand-surface distance broken down by motion and by object shape (Box, Sphere, Cylinder shown separately for each motion): Kinematic motions (Horizontal, Vertical, Circle, Hold; n=3 per shape) and Dynamic motions (Obj Drop, Slide, Throw, Tumble; n=2 per shape).
